

Job Portal System - Functional Overview

1. User Registration and Login

Registration:

- Users can register as either a Job Seeker or an Employer.
- Required details include Name, Email (must be unique), and Password.
- Job Seekers must upload their CV (resume) during registration.

Login:

- Users log in using their registered Email and Password.
- The Admin has separate login credentials to manage the system.

Admin Credentials:

- Username: alihasan@907
- Password: alihasan@907

2. Job Seeker Functionalities

- Upload and Update CV
- View Wishlist of interested jobs
- Apply for Jobs
- Receive Messages from Employers
- Send Messages to Employers
- Provide Feedback to Admin

3. Employer Functionalities

- Post Job Openings
- Update or Remove Job Postings
- Manage Applications from Job Seekers
- View Watchlist of potential candidates
- Send Messages to Job Seekers
- Provide Feedback to Admin

4. Admin Functionalities

- Review Feedback submitted by users
- Manage User Accounts (block/suspend users)
- Reactivate Accounts
- Ensure Platform Integrity and smooth functioning

5. User Status and Access Control

- Users can have different statuses: Active, Suspended, or Blocked
- Active users have full access to the platform
- Suspended or Blocked users cannot access their accounts until reactivated by Admin

Summary

The Job Portal System efficiently connects Job Seekers with Employers. Job Seekers can apply for jobs, and Employers can manage postings and applications. The Admin oversees the platform to ensure integrity and smooth operation, making the job search and hiring process effective for everyone involved.
